	\boxtimes	the entire international	al application.
		claims Nos	
be	caus	e:	
		the said international not require an interna	application, or the said claims Nos. relate to the following subject matter which does trional preliminary examination (<i>specify</i>):
	⊠	the description, claim unclear that no mean see separate sheet	s or drawings (<i>indicate particular elements below</i>) or said claims Nos. 1-28 are so ingful opinion could be formed (<i>specify</i>):
		the claims, or said cla	tims Nos. are so inadequately supported by the description that no meaningful opinion
		no international searc	ch report has been established for the said claims Nos
2.	and/	eaningful international or amino acid sequen uctions:	preliminary examination report cannot be carried out due to the failure of the nucleotide ce listing to comply with the standard provided for in Annex C of the Administrative
		the written form has n	not been furnished or does not comply with the standard.
			e form has not been furnished or does not comply with the standard.
/ II	. Cer	tain defects in the in	ternational application

The following defects in the form or contents of the international application have been noted:

see separate sheet

International application No. PCT/BE99/00123

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made: see separate sheet

Re Item III and VIII

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability; certain observations on the international application

- 1. Independent claims 1, 27 and 28 do not meet the requirements of Article 6 PCT in that the matter for which protection is sought is not clearly defined.
- 1.1 The term "infeed" used in claim 1 is obscure and leaves the reader in doubt as to the meaning of the technical feature to which it refers. The description and the drawings (see fig. 1) convey the impression that, by the term "infeed", an "insert" is meant.
- 1.2 To claim 1: it is considered that the expression: "corner joint...characterised in that it is provided with supplementary features which increase the resistance of this corner joint and thus of the mitre as a whole against deformation" attempts to define the subject-matter in terms of the result to be achieved which merely amounts to a statement of the underlying problem. By reading this independent claim, the skilled man is not able to determine which technical features are necessary to perform the stated result.
- 1.3 To claim 27: it is considered that the expression: "infeed corner piece for realising a corner joint according to any of the preceding claims...characterised in that this infeed corner piece has one or several of the characteristics which are described in the preceding claim[s] in relation to this infeed corner piece" is ambiguous, as the plurality of options makes it impossible to determine the matter for which protection is sought.
 - The same applies to claims 3, 4, 6, 7 and 13 (see point 2.).
- 1.4 To claim 28: the expressions: "...theoretically perfect shape..." and "...their perfect shape..." are unclear and leave the reader in doubt as to the technical feature to which they refer.
 - The expression: "locking means...in the shape of inwardly bent lips which are formed by pressing them in" is vague, as it is not clear on which element of the corner joint said "lips" have to be formed.
 - Furthermore, it is noted that a method for realising a corner joint according to

International application No. PCT/BE99/00123

claim 26 is claimed: nevertheless, said "inwardly bent lips" are not disclosed in claim 26.

- 2. With regard to the dependent claims, lack of clarity as a whole arises as the plurality of claims makes it difficult to determine the matter for which protection is sought, and places an undue burden on others seeking to establish the extent of the protection.
 - This situation is exacerbated for claims 3, 4, 6, 7 and 13, where the plurality of **options** within each claim makes it impossible to determine the claimed subject-matter. Hence, said claims do not meet the requirements of Article 6 PCT.
- 3. Furthermore, the present application contains relative expressions which have no well-recognised meaning and leave the reader in doubt as to the meaning of the technical features to which they refer, thereby rendering the definition of the subject-matter of said claims unclear (Article 6 PCT). Examples of said relative terms are the following:
- a. claim 2: "...significantly deeper...";
- b. claim 2: "...predominantly free of any material, possibly to the exception of a number...";
- c. claim 3: "...close to the maximally admitted upsetting...";
- d. claim 3: "...nominally sufficiently large...";
- e. claim 3: "...an upsetting is applied whose useful working force on the total mitre can only be increased by enlarging the deposit surface...";
- f. claim 26: "...characterised in that the above-mentioned supplementary features consist of the **right** adjustment and/or positioning and/or combination of several of the components...".

Re Item VII

Certain defects in the international application

4. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents DE 43 05 377 A and NL 7 213 375 A is not mentioned in the description, nor are these documents identified therein.
